Helping Working Americans Achieve A Financially Secure Retirement
How the 401(k) System Is Succeeding

Ayco Summer InnerCircle
Benefits and Compensation Conference
July 28, 2011
Saratoga Springs, New York

Paul Schott Stevens
President and CEO
Overview

• Why ICI? Role of Mutual Funds in Retirement
• Profile of the U.S. Retirement System
• Measures of 401(k) Success
• Features That Contribute to 401(k) Success
• Reaction of U.S. Households to the Financial Crisis
• Actions of 401(k) Plan Participants in the Financial Crisis
Why ICI? Role of Mutual Funds in Retirement

- Mutual funds comprise about half of the assets in defined contribution (DC) plans and individual retirement accounts (IRAs)
- Mutual funds are well-suited to retirement plans
- Fund sponsors help employers promote and develop the 401(k) system
- ICI has a large and active research program on retirement assets, plans, and participants
Mutual Fund Share of DC, IRA Assets

**Trillions of dollars, 2011:Q1**

- **DC Plans:** $4.7
  - Mutual funds: $2.6
  - Other investments: $2.1
  - 55%

- **IRAs:** $4.9
  - Mutual funds: $2.6
  - Other investments: $2.3
  - 47%

Mutual Funds Are Well-Suited to Retirement Plans

- Strong regulatory system
  - Diversification, custody, prohibitions on affiliated transactions, strict governance
- Transparency, daily pricing
- Fiduciary culture
- Comprehensive shareholder services
- Cost-effective investing
- Suitable for use in plans of all sizes
Fund Sponsors Help Employers Promote and Develop the 401(k) System

• Professional asset management, providing diversification, innovation
  ▪ Index funds, lifestyle funds, target date funds
• Recordkeeping, communications, and education
  ▪ Daily balances available by phone or Internet
  ▪ Educational materials
  ▪ Website tools and online calculators
  ▪ Income stream estimates on participant statements
• Research and advocacy
ICI Has a Large, Active Research Program

- Retirement assets
  - Member, financial institution, plan sponsor data
- 401(k) asset allocation, balances, loan activity
  - EBRI/ICI 401(k) database
  - ICI Survey of DC Plan Recordkeepers
- 401(k) services, fees, and expenses
  - ICI annual “The Economics of Providing 401(k) Plans”
  - Deloitte/ICI DC plan “all-in” fee study
- The IRA Investor Database™
- Household surveys
Profile of the U.S. Retirement System

- More than 82 million U.S. households have defined benefit (DB) plans, DC plans, or IRAs
- Assets earmarked for retirement have grown as a share of households’ financial assets
- DC plans and IRAs make up a growing share of retirement assets
- Since ERISA, a higher percentage of retirees are receiving private-sector retirement plan benefits, and in real terms the benefits are higher
70 Percent of U.S. Households Have Employer Plans, IRAs, or Both

Percentage of U.S. households, 2010

- Own IRA only: 8%
- Have IRA and employer-sponsored retirement plan: 33%
- Have employer-sponsored retirement plan only: 29%
- Do not have IRA or employer-sponsored retirement plan: 30%

Sources: ICI Annual Mutual Shareholder Tracking Survey and U.S. Census Bureau; see Holden and Schrass, “The Role of IRAs in U.S. Households’ Saving for Retirement, 2010,” ICI Fundamentals (December 2010)
U.S. Retirement Assets Top $18 Trillion in 2011:Q1

Note: For definitions of plan categories, see Table 1 in “The U.S. Retirement Market, First Quarter 2011.” Components may not add to the total because of rounding. Some data are estimated.
Pensions (DB and DC) Make Up a Growing Share of Retiree Income

Measures of 401(k) Success

- Retirement assets are growing, and DC plans and IRAs account for an increasing share
- Participants have positive attitudes:
  - Appreciate features of plans
  - Express confidence in plans
- EBRI/ICI and academic research projections indicate 401(k) plans can generate significant retirement income and wealth
## DC Savers Appreciate DC Account Features

**Percentage of DC-owning households agreeing with each statement, fall 2010**

EBRI/ICI Finds Full Careers with 401(k)s Generate Significant Retirement Income

- The EBRI/ICI 401(k) Accumulation Projection Model moves 401(k) participants through their careers, with decisions as they age that reflect actual participant behavior on contributions, asset allocations, job changes, rollovers, withdrawals, and loans

- Study focuses on 401(k) participants who will turn 65 between 2030 and 2039 (now aged 37 to 46)

- For more than 60 percent of this cohort, their 401(k) accumulations are projected to replace more than half their salaries

Source: EBRI/ICI 401(k) Accumulation Projection Model; see Holden and VanDerhei, “The Influence of Automatic Enrollment, Catch-Up, and IRA Contributions on 401(k) Accumulations at Retirement,” ICI Perspective and EBRI Issue Brief (July 2005)
Academic Research Finds Full Careers with DC Plans Generate Significant Nest Eggs

“Our projections suggest that the advent of personal account saving will increase wealth at retirement for future retirees across the lifetime earnings spectrum.”

—James Poterba, MIT; Steven Venti, Dartmouth College; and David Wise, Harvard University

Features That Contribute to 401(k) Success

• Plan sponsors and service providers highlight the importance of retirement saving (education and tools)
• Employers play a fiduciary role
• Plans offer discipline—saving paycheck-by-paycheck (payroll deduction; dollar-cost averaging)
• DC plan design is well-suited to a mobile workforce (portability)
• Plans offer investment opportunities and flexibility
• Sponsors, providers innovate in plan design
Growth of Automatic Enrollment Reflects 401(k) Innovation

Reaction of U.S. Households to the Financial Crisis

- U.S. households express less willingness to take financial risk and risk tolerance has declined across many age groups
- Households in their thirties are less likely to hold equities today compared with a decade ago
- A majority of households became more financially conservative in the wake of the financial crisis
U.S. Households Express Less Willingness to Take Financial Risk

Percentage of households willing to take above-average or substantial financial risk for commensurate levels of financial gains

- All U.S. households
- DC- or IRA-owning households

1989: 13% (All U.S. households), 14% (DC- or IRA-owning households)  
1992: 17% (All U.S. households), 19% (DC- or IRA-owning households)  
1995: 24% (All U.S. households), 23% (DC- or IRA-owning households)  
1998: 23% (All U.S. households), 33% (DC- or IRA-owning households)  
2001: 23% (All U.S. households), 32% (DC- or IRA-owning households)  
2004: 19% (All U.S. households), 27% (DC- or IRA-owning households)  
2007: 20% (All U.S. households), 28% (DC- or IRA-owning households)  
2009: 19% (All U.S. households), 25% (DC- or IRA-owning households)  
2010: 20% (All U.S. households), 25% (DC- or IRA-owning households)

**Birth cohort**
- 1960–1969
- 1970–1979

Source: ICI Annual Mutual Fund Shareholder Tracking Survey
Households Became More Financially Conservative

Over the past three years, 58 percent made one or more of these moves:

- Increased regular saving;
- Shifted investments away from stocks (to be more conservative);
- Delayed retirement or increased retirement age.

Sample of 2,039 households with IRAs, DC accounts, or other financial assets

Source: ICI tabulation of GfK OmniTel survey data (November and December 2010); see Holden, Bass, and Reid, Commitment to Retirement Security: Investor Attitudes and Actions (January 2011)
Actions of 401(k) Plan Participants in the Financial Crisis

- Account balances tended to rise and fall with the stock market, but participants were well-served by dollar-cost averaging into equities
- Participants generally stayed the course
- Like other households, retirement savers express less willingness to take financial risk, but 401(k) features help savers maintain a balanced approach
Contributions, Returns Helped Consistent 401(k) Participants Bounce Back in 2009

Average account balance* among 401(k) participants who held accounts from year-end 2003 through year-end 2009

*Account balances are participant account balances held in 401(k) plans at the participants’ current employers and are net of plan loans. Retirement savings held in plans at previous employers or rolled over into IRAs are not included.

DC Plan Participants Stayed the Course

Summary of recordkeeper data; percentage of participants

- Took any withdrawal: 3.9% (2008), 3.1% (2009), 3.5% (2010)
- Took hardship withdrawal: 1.3% (2008), 1.6% (2009), 1.7% (2010)
- Stopped contributing: 3.7% (2008), 3.4% (2009), 2.4% (2010)
- Changed asset allocation of account balance: 14.4% (2008), 11.8% (2009), 10.3% (2010)
- Changed asset allocation of contributions: 12.4% (2008), 10.5% (2009), 8.0% (2010)

Note: The samples include more than 22 million DC plan participants for 2008; nearly 24 million DC plan participants for 2009; and more than 23 million DC plan participants for 2010.

401(k) Participants Have Tempered Their Account Allocation to Stocks
